

Know which rural hospital is slipping **weeks before** the monthly report does.

Early-warning intelligence for companies that manage rural and critical access hospitals. One view across every hospital, and a plain-English briefing every Monday.

THE PROBLEM

~1 in 2

rural hospitals operate at a financial loss

10%+

denial rates at many organizations, hitting thin margins first

Weeks

between a problem starting and it showing up in a report

HOW IT WORKS

Upload monthly exports

Financial and operational reports from each hospital, whatever system it runs. No patient data, ever.

Spot trouble early

Cash, A/R, denials and staffing are tracked against each hospital's own history and its peers.

Get the Monday briefing

Which hospitals need attention, why, and where to look first. Every number traces to its source.

BUILT FOR

- ✓ Rural hospital management companies
- ✓ Turnaround teams working against a deadline
- ✓ CFOs and COOs overseeing several hospitals

WHY IT'S DIFFERENT

- ✓ Made for small rural hospitals, not big health systems
- ✓ Works with the patchwork of systems you already have
- ✓ Starts on non-patient data, so it's easy to approve

Free Health Snapshot for your hospitals

We'll run your hospitals through public cost report data and show you what we see.
